**TO REDUCE ERRORED SEQUENCE LISTINGS, PLEASE USE THE CHECKER VERSION 3.0 PROGRAM, ACCESSIBLE THROUGH THE U.S. PATENT AND TRADEMARK OFFICE WEBSITE. SEE BELOW:**

### **Checker Version 3.0**

The Checker Version 3.0 application is a state-of-the-art Windows based software program employing a logical and intuitive user-interface to check whether a sequence listing is in compliance with format and content rules. Checker Version 3.0 works for sequence listings generated for the original version of 37 CFR §§1.821 - 1.825 effective October 1, 1990 (old rules) and the revised version (new rules) effective July 1, 1998 as well as World Intellectual Property Organization (WIPO) Standard ST.25.

Checker Version 3.0 replaces the previous DOS-based version of Checker, and is Y2K-compliant. Checker allows public users to check sequence listings in Computer Readable form (CRF) before submitting them to the United States Patent and Trademark Office (USPTO).

The checker will inform the user of errors expected to occur in uncorrected sequence listings, thus saving time and money.

**Checker Version 3.0 can be down loaded from the USPTO website at the following address:**

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1863. It is a very important document, as it is the first time that the President has addressed the Congress since the beginning of his term. The letter is a very long one, and it covers a wide range of topics. It begins with a discussion of the state of the Union, and then goes on to discuss the various problems that the country is facing. The President then goes on to discuss the various measures that he has taken to deal with these problems, and he ends the letter with a call to action for the Congress.
